OVERVIEW OF SEDBERRY FAMILY HISTORY
(as of June, 1995)

Sedberry is an English name. The original was probably Sudbury, meaning South Bury, "Sud" being old English for south, and the suffix "bury" meaning borough, castle, or manor.

In 1638 two Sedberry men, Peter, & John landed in Virginia. Family lore has it that they were brothers, progenitors of the North Carolina Sedberry family and perhaps every Sedberry in this country.

There is a one hundred year gap in my records between these two immigrants and John Sedberry, born in Virginia about 1730. John had a son named George. George moved from Brunswick County, Virginia to a farm near Troy, Montgomery County, North Carolina about 1795. He had seven sons and a daughter, all born in Virginia. The sons names (born), were JOHN (1770), JAMES H. (1776), WILLIAM (1777), GEORGE II (1778), MILES (1781), JAMES MERRITT (1787), and DAVID (1793). From these seven sons spring most of the Sedberry families in the United States.

o JOHN moved to Arkansas Territory about 1820.

o Descendants of JAMES H. moved to Tuscaloosa, Alabama; Forest, Mississippi; west Tennessee; and San Angelo, Texas.

o Shadrach, son of GEORGE II, moved to Wetumpka, Alabama about 1830.

o JAMES MERRITT moved to Maury County Tennessee before the county was organized (1807), living near Spring Hill, then about 1854 moved to Texas, near Waco, following his oldest son, William Rush Sedberry Sr.

o WILLIAM moved to Maury County, Tennessee in 1834. Descendants of his son Gates Washington appear in Eddyville and Louisville, Kentucky; and in Chicago, Illinois.

This is my understanding of Sedberry history as of the above date. It will change as research reveals new information. To improve what I have, please send what you know. To keep up with the latest, stay in touch. This is a joint effort. I can't do it without your help.

I have yet to find a Sedberry in the United States who did not have roots in North Carolina. I think that all are related. I have 2 main Sedberry lines, and many "clumps" of 5 generations or less. They are scattered all over the United States from Virginia to California. My goal is to link them all together.

INTRODUCTION

Following is a portion of the Sedberry Family History as I understand it today. I believe the accuracy level of the material to be well above 90%, but there will always be errors in this type of work.

I have chosen to include oral and written information from knowledgeable, well intentioned family members, then try to find official documents to support that data. Inclusion at this early stage allows me to distribute the material to the family and establish a feedback loop which is constantly correcting the material. I am constantly acquiring third party documents as objective evidence. My goal is to have at least two supporting documents from third party sources for every person listed.

Since wide distribution through the family, and feedback from the family, is crucial to the success of this project I make this offer; I will send a similar report to anyone who will send at least two family group sheets, one on their immediate family and one on their parents. One for the Sedberry grandparents would be very greatly appreciated, but not necessary to qualify for a report. The family group sheets do not have to be complete in every detail, just send what you know. It does not matter if I already have the information. I want it from you. Make as many copies of the enclosed family group sheets as you need. Copies of supporting documents would be greatly appreciated.

Money can not buy this material. A little work can.

This is a work in progress! It will take years to finish. If we work together we can compile a family history that will help our descendants know from whence they came, and thus help them know how to proceed.

EXPLANATION OF THE CHARACTERS TO THE LEFT OF THE NAMES ON DESCENDANCY PRINTOUT

This is called the Henry numbering system, and is used to number the descendants of any selected person. These numbers are not permanently assigned to an individual, but vary as different people are selected to head the descendancy report.

The person selected is always assigned the number 1. The first child of number 1 is number 11, the second child is number 12, etc. Letters of the alphabet are used when the person has more than nine children. 1A designates the 10th child of number 1. The number 1234 designates the 4th child of the 3rd child of the second child of number 1.

To find the parent of number 1234, look for number 123. The number of digits in a person's number indicates the number of generations from number 1, thus number 13421 is a fifth generation descendant of number 1.

Note the presence or absence of a plus sign to the left of a person's name when they are listed as a child. The presence of a plus sign means that the descendants (if any) of that person will be listed in the report. The absence of a plus sign means that descendants will not be listed. The presence of a plus sign does not mean that the person has descendants.

I use this tool to focus the report for the person who is receiving it, eliminating branches of the tree not in a direct line to the ancestor selected, hopefully making the report more interesting and useful. At this writing a full report report of the descendants of John Sedberry (b abt 1730) runs over 250 pages.

Another use for this tool is to omit the descendants of females, which gives a surname report of the person selected as number 1. If I select this option for John Sedberry (b abt 1730) only the name Sedberry will appear in the index. This report runs about 125 pages.

I would be glad to furnish any of these reports to anyone who contributes to the cause. Shameless bribe? You bet!
